I am making my letter to your court my last in my latest barrage of verbal declarations over writing as I saved it for last and I intend to wait another 2 weeks at minimum before I send more out so I can see the response. My case is legally in between two courts at the moment as I'm sure you are competently aware of, so it is only natural for me to send something to the person in between those two otherwise known as the Senior District Judge.

I will start by giving you good information. Again, you are known for wanting one million years out of everyone who passes through your courtroom. Dr. Aubrey de Gray is a California based scientist who founded the Sens Labs aimed at furthering the "Methuselahity" science cause which aims to edit the human genome to the point of bringing us back to advanced ages like those seen in the days of Genesis when Methuselah made it to 1000 (969). Introducing that company to the U.S. Dept. of Health makes that goal come closer to reality for you. Secondly, I do not know what is stopping anybody at the Robert H. Jackson U.S. Courthouse from pursuing school assemblies aimed at teaching kids how to identify and report pedophiles.

Now to the point. This facility's staff looks at me and says "When is your out date?" I tell them if I make it to at least October, I will be giving the courts and lawyers problems. Why should I lie at this point? How sad that the oldest

(2)

grandson of a former village judge had to go through what I did. I fully intend on [redacted] [Victim 1] being sued for "failure to comply with previously agreed upon business arrangements as he agreed to help us with a replacement and upgrade to the infraction that happened to me. Also, there is nothing stopping me from eventually signing over a wrongful incarceration check of at least \$1,000,000 entirely over to the Buffalo Federal Defender's Office so they may even go as far as to privatize among themselves and throw all kinds of things at the 2nd Circuit to undermine the Robert H. Jackson U.S. Courthouse. I bet Mr. John L. Sinatra Jr. would love to go find that \$100,000 so we can help his Chris Farley David Spade counterpart Peter Dinklage out with financing his furthered criminal defense in the Buffalo Federal Public Defender's Office through US Appeals because yes I would absolutely sign over a wrongful incarceration check entirely in that direction no matter how big it is.

Now this, Niagara County Jail knows its true that I did not leave the facility to receive this "provisional sentence". Was Katie [redacted] the Hermes messenger Goddess who delivered the paperwork to Niagara County Jail after she edited it? Did the court actually sentence me to 2 years on this violation, thereby qualifying me for an immediate transfer into a halfway house by the BOP, oh but Katie's revisions were meant to make the BOP civilly confine me?

As I said, this letter is my last for 2 weeks. I will dial it up a notch if I have to. Wow the things we can accomplish and uphold all throughout the 2nd Circuit. I imagine Kathy Hochul would love to bypass the NY Supreme Court and get 2nd Circuit Court approval to command the New York State Troopers to surround the Seneca Allegany Casino and the Seneca Niagara Casino to give to herself. No such thing as states rights in terms of Kinzua Dam seizures of that nature. A year ago I learned about an old binding clause between American lawyers and British lawyers along the lines of a "Queen's Card", and it is absolutely true that Elizabeth II and Harry have appeared to me in dreams at night in the last month. There is absolutely a binding arrangement between myself and Matthew Atkinson at the moment and he is in Sheffield U.K. Peculiar that I find myself in New England at the moment as I ask a venue in Provincetown for help connecting with him. That venue being Full Kit Dear, that subculture finding itself centered globally on Keron which is on my FBI Discovery. Keron being British. Would the Robert H. Jackson U.S. Courthouse like me to terrestrially inform the U.S. Ambassador to England about my whereabouts over an email from 1/27/22 I very well could have lied about my own guilt in terms of? I know the English don't want to be picked up on and convicted of making international threats in Sinatra's court after the shitshow my case saw.

Did you know Eli of the Old Testament put his two sons Hophni and Phineas on probation? Probation is very Jewish. Would somebody like to ~~for~~ my handwriting at the Robert H Jackson Courthouse and tell a bunch more Appeals Judges out there that its time for a nationwide defunding of federal probation as they shove everyone back in jail no matter what? People v. Croswell is a case from 1804 similar to mine, British subject who raised his voice at George Washington a little too hard. Jefferson Davis found refuge in England during Grants time. Oh my oh my to invite a little Gridlock Buffalo War of 1812 over my illegitimate sentence. Looks like I'll have to send the US Ambassador to England off to something soon on top of notifying other Appeals Judges across the colonies about our intentions in the 2nd Circuit to grant Kathy Hochul court approved executive authority to seize those two casinos for herself for starts. Kathy Hochul knows the help I gave her giving her Republican state legislator cell phone numbers.

I bet Peter Grasi would love mine and Harrys help taking his business to London where Percon of my F.B.I. Discovery is headquartered. My grandmother [REDACTED] for ancient American legally binding reasons regarding that Queen's Card, transcends Kinatria Vatican royalty.
